

# I'm standing up to *Lupus Nephritis*

## What's the goal of treatment?

It's important to stop lupus nephritis' attack on the kidneys and protect them from further irreversible damage. If left untreated, lupus nephritis can lead to kidney failure, which may require dialysis or a kidney transplant.

In clinical trials, LUPKYNIS<sup>a</sup> was shown to:

### Help control lupus nephritis

For people taking LUPKYNIS, the chance of getting their lupus nephritis under control<sup>b</sup> after one year of treatment was almost **3x greater<sup>c</sup>** than for people only taking mycophenolate mofetil (MMF) and steroids.

### Lower the dose of steroids needed

LUPKYNIS helped to stop the attack of lupus nephritis without high-dose steroids.

### Reduce protein in urine

People taking LUPKYNIS saw a **50% reduction** of protein in the urine (called proteinuria, a key sign of disease activity), on average after just one month.

## WHAT IS LUPKYNIS® (voclosporin)?

LUPKYNIS is a prescription medicine used with other medicines to treat adults with active lupus nephritis. LUPKYNIS should not be taken with a medicine called cyclophosphamide. Talk with your healthcare provider if you are not sure if you take this medicine.

**Lupkynis**<sup>®</sup>  
(voclosporin) capsules  
7.9 mg

Actor portrayal

<sup>a</sup> As part of a treatment plan that included MMF and steroids.

<sup>b</sup> Control was defined as reducing protein in the urine to  $\leq 0.5$  mg/mg, while helping maintain kidney function.

<sup>c</sup> The odds ratio was 2.7. The odds ratio was determined by comparing the likelihood that someone taking LUPKYNIS along with MMF and steroids would get their lupus nephritis under control after 1 year of treatment to the likelihood for someone only taking MMF and steroids.

## IMPORTANT SAFETY INFORMATION

**LUPKYNIS can cause serious side effects, including:**

- **Increased risk of cancer.** People who take LUPKYNIS have an increased risk of getting some kinds of cancer, including skin and lymph gland cancer (lymphoma). Limit and avoid exposure to sunlight and UV light such as tanning machines. Wear protective clothing and use a sunscreen.

**Important Safety Information continues**

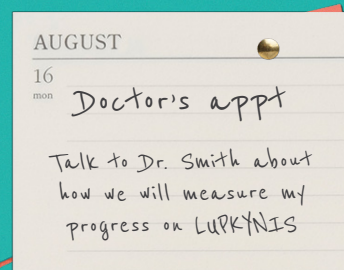

# LUPKYNIS helps me *take on the challenge*

## How to take LUPKYNIS

- 3 capsules by mouth, 2x a day
- On an empty stomach 12 hours apart
- Swallowed whole, not crushed, opened, or divided

Your doctor will determine the right dosage for you. Always take LUPKYNIS as directed by your doctor.

**Missed a dose?** Take it if it's within 4 hours of the missed dose. If it's beyond 4 hours, skip it and take the next scheduled dose. Never double a dose to make up for any you've missed.

## How to store LUPKYNIS

- At room temperature
- Sealed in the original packaging until ready to be taken to maintain the quality of the capsule

## How will I receive my dosage?

Based on your prescription, you may receive your capsules in 1-2 wallets or a carton of 3 wallets. Each wallet contains 4 blister packs of 15 capsules.

## IMPORTANT SAFETY INFORMATION (*continued*)

- **Increased risk of infection.** LUPKYNIS is a medicine that affects your immune system. LUPKYNIS can lower the ability of your immune system to fight infections. Serious infections can happen in people taking LUPKYNIS that can lead to hospitalizations and can cause death. **Call your healthcare provider right away** if you have symptoms of an infection such as fever, sweats or chills, cough or flu-like symptoms, muscle aches, or warm, red, or painful areas on your skin.

**Do not take LUPKYNIS** with medicines known as strong CYP3A4 inhibitors such as ketoconazole, itraconazole, and clarithromycin, or if you are allergic to any of the ingredients in LUPKYNIS. You should not eat grapefruit or drink grapefruit juice while taking LUPKYNIS.

**Important Safety Information continues**

# Feel *empowered* during treatment

Your doctor will track your treatment progress with routine testing—so it's important to attend all of your appointments.

- **Blood tests** check how well your kidneys are working
- **Urine tests** monitor protein levels in your urine (a sign of disease severity)

**Don't forget:** always review your test results with your doctor and ask questions. **Tell your doctor** about any side effects or symptoms you may be experiencing.

## IMPORTANT SAFETY INFORMATION (*continued*)

Before you use LUPKYNIS, tell your healthcare provider about all your medical conditions, including if you:

- Plan to receive any vaccines. You should not receive any live vaccines during treatment with LUPKYNIS. Other vaccines may not work as well during treatment with LUPKYNIS.
- Have or have had liver, kidney, or heart problems.
- Have high blood pressure.
- Are pregnant or plan to become pregnant or are breastfeeding or plan to breastfeed when taking LUPKYNIS. When taking LUPKYNIS in combination with mycophenolate mofetil, read the Medication Guide for mycophenolate mofetil for important pregnancy information. These medicines can harm your unborn or breastfed baby.

**Tell your healthcare provider** about all the medicines you take, including prescription and over-the-counter medicines, vitamins, and herbal supplements. LUPKYNIS may affect the way other medicines work, and other medicines may affect how LUPKYNIS works.

### **LUPKYNIS may cause serious side effects, including:**

**Kidney problems.** Kidney problems are common side effects of LUPKYNIS and may be serious. Your healthcare provider may do certain tests to check your kidney function while you take LUPKYNIS.

**High blood pressure.** High blood pressure is a common side effect of LUPKYNIS and may be serious. Your healthcare provider will monitor your blood pressure while you take LUPKYNIS and may ask you to check your blood pressure at home.

# With *Aurinia Alliance*<sup>®</sup> you'll never fight alone

Now that you're starting LUPKYNIS and have enrolled in the Aurinia Alliance support program, you'll work with your dedicated Nurse case manager throughout your treatment journey - including during any life changes that may impact your access to medication.

Learn more at [AuriniaAlliance.com](https://AuriniaAlliance.com)

Stay in touch with your Nurse Case Manager by phone from 8AM-8PM EST, Monday through Friday at **1-833-287-4642** (1-833-AURINIA).

## Frequently Asked Questions

### How does LUPKYNIS work?

LUPKYNIS works to calm your immune system, which is causing your body to attack the cells of your kidneys. It helps reduce inflammation and protect specific cells of the kidneys to keep them functioning.

### How does my Nurse Case Manager support me during treatment?

Your dedicated Nurse Case Manager is available to assist you with navigating insurance, LUPKYNIS funding options and costs, and staying on track with your treatment. But if you have questions specific to your LUPKYNIS treatment, always talk to your doctor as Nurse Case Managers cannot give medical advice.

## IMPORTANT SAFETY INFORMATION *(continued)*

**Nervous system problems.** Nervous system problems are a common side effect of LUPKYNIS and may be serious. Call your healthcare provider or go to the nearest hospital emergency room right away if you have any of these symptoms while taking LUPKYNIS:

- confusion
- changes in alertness
- muscle tremors
- numbness and tingling
- headache
- seizures
- vision changes

**High levels of potassium in your blood.** Your healthcare provider may do certain tests to check your potassium levels while you take LUPKYNIS.

**A serious heart rhythm problem (QT prolongation).**

**Severe low red blood cell count (anemia).** Your healthcare provider may check your labs while using LUPKYNIS.

**The most common side effects of LUPKYNIS are** diarrhea, headache, cough, urinary tract infection, stomach pain, heartburn, and loss of hair (alopecia). These are not all the possible side effects of LUPKYNIS. For more information, ask your healthcare provider. You may report side effects to FDA at **1-800-FDA-1088**. You may also report side effects to [www.fda.gov/medwatch](https://www.fda.gov/medwatch).

**Please see Prescribing Information, including Boxed Warning, and Medication Guide.**
